CANOPY

MILL DISTRICT

# CANOPY AT MILL DISTRICT

Olson Kundig masterfully fuses architecture and interior design to create an inspired sense of place authentic to Healdsburg, California, and its prized small-town charms. Expansive indoor living spaces flow seamlessly to wrap-around outdoor terraces, set within a preserved grove of heritage redwood trees.

Welcome to an exclusive collection of stunning penthouse residences in the heart of Healdsburg and the world-famous food and wine culture of Sonoma County.

The Penthouses at Canopy overlook a grove of heritage redwood trees and the gardens of The Preserve.

# WINE COUNTRY'S ONLY PENTHOUSES

The Penthouses at Canopy are the only opportunity in wine country to experience panoramic, tree-level living. Spacious wrap-around terraces, temperature-controlled wine rooms, and luxuriously-appointed indoor and outdoor kitchens, dining and lounging areas adorn each residence. Sliding glass walls command breathtaking views of Fitch Mountain and downtown Healdsburg, elevating the art of living and entertaining inside and out.

These never-before, never-again Canopy Penthouses are a one-of-a-kind experience for those in search of the ultimate in wine country living.

Penthouses are filled with natural light, with 10' ceilings and expansive glass walls that bring nature's panorama into the home.

# CRAFTING THE ULTIMATE HEALDSBURG RESIDENCES

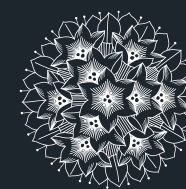

The Penthouses at Canopy are the result of a rare and remarkable collaboration between two world-class talents.

Olson Kundig is renowned for creating exceptional and innovative homes sought after by the world's most discerning clientele. Kyle Connaughton is globally recognized for SingleThread, a 3 Michelin Star farm, restaurant and inn showcasing the unique seasonal tastes of Sonoma County, alongside award-winning wine curation.

Together, they have imagined the extraordinary integration of architecture, interior and kitchen design, and wine amenities in the Penthouses at Canopy.

## NATURE-INFUSED, FULLY-INTEGRATED DESIGN

Honored members of *Architectural Digest's* AD100 list for the ninth consecutive year in 2021, and included among *Fast Company's* Top Ten Most Innovative Companies in Architecture, Olson Kundig is world renowned for head-turning fusions of indoor and outdoor spaces in architecture and design.

Olson Kundig has designed the Penthouses at Canopy with a sense of awe-inspiring openness, where sliding walls seamlessly combine lofty interiors with stunning exteriors in a fluid living experience. Extensive use of natural materials reflects the influence of the surrounding environment, creating a relaxing and revitalizing atmosphere in the living spaces.

Remarkable artistry and craftsmanship can be found throughout, from distinctive entrances, custom interior architecture features, and hardware that brings a noteworthy level of materiality and detail to the Penthouses.

Olson Kundig creates dramatic integrations  
of exterior and interior living.

## HALLMARKS OF DISTINCTION

**FIRST IMPRESSIONS** The grand entrance features an 8' custom door with crafted steel hardware that opens to soaring 10' ceilings.

**TACTILE AND NATURAL** Olson Kundig-designed interiors feature organic, timeless materials, including large plank oak hardwood floors, wood cabinets and natural stone countertops, exuding warmth and rooting living environments in a strong sense of place.

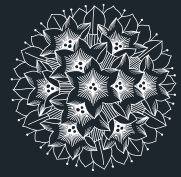

**LIFE OUTSIDE** Sliding glass walls lead on all sides to wrap-around terraces, featuring over 1000 square feet of outdoor living space. Glass railings instill a feeling of connectedness with the surrounding natural environment.

**NO DETAIL TOO SMALL** Unique and precise finishing is infused in even the smallest Penthouse detail, including crafted steel cabinet pulls.

**MATERIALITY** Penthouse owners can choose one of two refined, tactile, enduring and natural color palettes selected by Olson Kundig Interiors.

## CHEF & SOMMELIER- INFLUENCED DESIGN

Accoladed with 3 Michelin stars, Chef Kyle Connaughton of SingleThread Farm, Restaurant and Inn—one of only six Michelin 3-starred restaurants in California, and voted the 37th best restaurant in the world in 2021—provides creative direction to ensure that Penthouse kitchens are designed for incomparable function and performance.

Winner of the 2021 Wine Spectator Grand Award, SingleThread's Wine Director, Andrew Rastello, guides the function and design of the Penthouses' temperature-controlled wine rooms to ensure optimal storage and display.

And SingleThread's Head Farmer, Katina Connaughton, curates the culinary gardens on Penthouse terraces, for a fully-integrated cooking experience.

Their direction and influence ensures that Penthouse owners will embody Sonoma County's approach to food and wine: cooking and eating with the seasons, enjoying fresh herbs and greens from their kitchen gardens, and gathering over long, leisurely meals under the stars.

Chef Kyle Connaughton and the SingleThread team have optimized the food and wine experience at Canopy.

# A SINGLETHREAD-ENHANCED LIVING EXPERIENCE

**KITCHEN DESIGN AND PERFORMANCE** Chef Kyle Connaughton chose German-engineered Miele appliances for high-performance kitchens, and will provide Penthouse homeowners with ideas for flawless kitchen organization and function.

**WINE EDUCATION AND CURATION** SingleThread's Wine Director, Andrew "Rusty" Rastello, will be available to Penthouse owners who choose to fully customize their wine collections. Whether you're new to wine or an experienced collector, Rusty will ensure that Penthouse owners make the most of their temperature-controlled wine rooms.

**CULINARY KITCHEN GARDENS** SingleThread's Head Farmer, Katina Connaughton, will oversee planting of fresh herbs and salad greens in culinary gardens, for true terrace-to-table cooking experiences.

Entertain with indoor and outdoor  
kitchens and dining areas.

Over 1,000 square feet of stone terrace wraps around the Penthouses, for a nature-infused living experience.

10' floor-to-ceiling glass walls glide open for a seamless interplay of indoor and outdoor living space.

Primary bedrooms feature open, stylish design and private outdoor space.

Freestanding soaker tub in an ensuite with stone flooring and countertops.

# THE POOLHOUSE

The Poolhouse is a private social, health and wellness facility, just steps from Canopy.

Centered around an elevated, private lap pool and expansive pool deck, The Poolhouse is for the exclusive use of Mill District residents—a place where they can refresh, relax, socialize and entertain.

The Poolhouse is complete with fitness and movement studios, a living room, and a demonstration kitchen that can be transformed for business meetings.

Plan your day with the Experience Concierge over a morning espresso. Swim laps or work out with your personal trainer. Later, unwind on the pool deck with your favorite beverage, then spend the evening taking cooking classes, or wining and dining with a local winemaker and private guest chef.

The well-appointed living room and kitchen opens seamlessly to the pool deck, providing homeowners with a gathering place for receptions, reunions, and more. The Poolhouse also includes bike storage.

The Poolhouse is designed by SB Architects, an international architecture practice based in San Francisco, with 60 years of experience in providing clients with the highest level of creativity and design excellence for hospitality, residential and mixed-use developments.

## SUSTAINABILITY

At Mill District, sustainability is central to everything we do. That commitment goes beyond embracing redevelopment of a former industrial site, and building up into the redwood canopy, instead of sprawling out into Healdsburg.

Mill District utilizes solar panels on every building, electric vehicle charging station infrastructure in the garage, and an expansive recycling program. All of the power will be sourced from renewable energy sources. In-home designs incorporate low-flow fixtures, reducing water usage by up to 60%.

VITA Planning & Landscape Architecture, a renowned firm with experience on five continents, will be designing the garden landscape for Mill District. Drought-tolerant plants have been incorporated into the landscaping, and state-of-the-art irrigation systems collect rainwater and runoff. The gardens are maintained using weather synch technology, adjusting to the season, temperature, rain, and soil moisture.

Mill District is cycling and pedestrian friendly, and our vision for sustainability extends well into the future—when Sonoma-Marín Area Rail Transit comes to Healdsburg, it will stop across the street, obviating the need for cars. The better we take care of our environment, the more it will take care of us.

# BUILDING FEATURES
